Di. 07.03. 09:00 - 13:00
Kick-Off

Betreuung: Dienstag, 09:00 - 13:00
Betreuer: Seung H-Sang
Mladen Jadric

Affordable housing is a basic requirement and an essential ingredient of a just, inclusive and sustainable city. With the low housing affordability in Seoul it is of paramount importance that the students of architecture, interior architecture, construction, planning and landscape architecture are introduced to models of affordable housing that are accessible to the majority of the city's population. The course takes the students to the city of Vienna where more than 60% of the city's population lives in some form of subsidized apartments. The Viennese model of affordable housing is built on a diverse definition of social and affordable housing that includes city-owned flats and limited profit housing co-operatives. The City of Vienna organizes special „developers' contests“ that promote a developer – architect alliance and encourage innovative engagements between construction, design, and planning professions.

The LANDSCRIPTS OF VIENNA AND SEOUL course is offered to a maximum number of 30 students currently enrolled in Master of Architecture and Planning. An intensive study of the urban typology of housing will be undertaken at the Technical University of Vienna between March and August 2016.

During this period, SDF and TU students will collaborate with Guest Professor Seung H-Sang (SDF), Mladen Jadric (TU) and various experts and practitioners.

Results of the course should be presented in Seoul like Korean-Austrian contribution to the BIENALLE SEOUL 2017 (September-November 2017).

The Course will be held in english.
